DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-6, 10-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Re Claim 1, line 9-10, recites "description units are utilized simultaneously with the construction and with the recording of the description units in a memory buffer of the same stream". The specification lacks how the "description units" are constructed simultaneously with the recording of the "description units" in memory. The specification discloses that the "description units" are memory spaces in the memory buffer. It appears that the "description units" are already constructed and then used for recording. (Same reasoning for claim 10) Applicant is requested to reference the specifications.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6, 10-18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 lacks positive recitation.

Claim 1 recites the limitation "description units" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "said associated description units" in line 13-14. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the same memory buffer" in line 12. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the same stream" in line 11. There is insufficient antecedent basis for this limitation in the claim.

(applicant is request to review the antecedents for all the claims)

Claim 1 recites, "description units are utilized simultaneously with the construction and with the recording of the description units in a memory buffer of the same stream". it is unclear what is being recorded. "description units" are memory space used for recording descriptors. Memory space can not be used for storing in the same memory space.

Claim 18 is a single means.

Drawings

5. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "means for constructing and for storing", "means to read" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

6. Claim 18 is objected to because of the following informalities: in line 12 "." should be deleted. Appropriate correction is required.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
